ABOUT US

Otsuka Information Technology Co., Ltd. (OTIC), founded in 1997, is Taiwan’ s first publicly listed company dedicated to the sales, integration, and consulting of CAD systems. Backed by a strong sales force and technical support team, OTIC delivers comprehensive solutions for enterprise digital transformation, including environment setup, user training, consulting, and system customization. Its services support the implementation of advanced manufacturing software, such as CAD, CAM, CAE, and PLM, as well as building information technology solutions, including AEC and BIM.

OITC continues to focus on the manufacturing, construction, and multimedia industries and has established a comprehensive service network in China to support Taiwanese businesses across Mainland China, Taiwan, and Hong Kong, as well as their subsidiaries in Mainland China, in system implementation and technology integration. In recent years, it has also actively expanded into areas such as AI applications, smart manufacturing, digital engineering, and high-performance computing, assisting companies in promoting sustainability and digital transformation and enhancing their competitiveness in the future smart industry.

Company Profile

ABOUT EFD CORPORATION

OITC's subsidiary, EFD Corporation specializes in engineering simulation and thermal analysis. In response to the rapid development of industries such as AI chips, high-performance computing, electric vehicles, servers and data centers, the market demand for high-power, high-density packaging and system-level heat dissipation and reliability verification has increased significantly. By combining CAE engineering simulation software, professional consulting services and thermal measurement laboratories, EFD helps companies make data-driven engineering decisions and accelerate product development and design verification processes.

Solutions & Servies

(1) **Engineering Simulation and Analysis Solutions**
We provide advanced CAE tools for thermal and structural engineering analysis and integrate them with education, training, and consulting services to help companies perform verification and optimization during the design phase.

(2) **Thermal property measurement and verification services**
Establishment of specialized thermal characteristics measurement laboratories, offering product design analysis, semiconductor component thermal characteristics, and high-power component power cycling measurement services.

(3) **Introduction of Measurement Equipment and Technology**
We provide sales and implementation support for professional thermal property measurement equipment, helping companies establish in-house testing and reliability verification capabilities.

OUR DEVELOPMENT

1997 — Japan Otsuka Corp. and Taiwan's Aurora Group jointly founded the joint venture Aurora Otsuka Corp. to engage in the sale of CAD/CAM software and IT system integration.

1998 — Taichung Branch

1999 — Kaohsiung、Tainan Branch

2000 — Obtained the agency rights for Autodesk in China and became the only distributor with agency rights in both Taiwan and Mainland China.

2002 — Otsuka Corporation became the sole shareholder of the company. Later renamed the company as Otsuka Information Technology Corp.

2004 — Hsinchu Branch

2007 — Otsuka Software Trading (Dong-guan) Limited

2008 — *Obtained the right of agency to sell Siemens' NX products.
*Obtained the right of agency to sell Pro/E, the parametric technology drawing software.

*Obtained platinum distribution rights for PTC.
*Obtained distribution rights for all of Autodesk's product lines.

2011 — *Stock officially listed
*Launched the self-developed PDM management system

3570

OITC Information Technology (shanghai) Limited

2014 — *Named as the only Platinum Agent of all Autodesk's product lines.
*Named as the only Platinum Agent of all of PTC's products.
*Obtained golden distribution rights for Siemens' s NX products in both Taiwan and China.

2016 — *EFD Corporation Expanding into the Cross-Strait Simulation Market (Taiwan and Mainland China).

*Obtained ISO 27001 ISMS Certification
*Reaching new heights, Sales exceeded 2.1 billion★★★

2017 — *Won the Corporate Governance Assessment Progress Award

2018 — Obtained the agency agreement of ConMas i-Reporter

2021 — *The laboratory has obtained national-level TAF ISO/IEC 17025 certification.
*Monthly revenue hit a record high, exceeding 300 million★★
*Obtained the agency agreement of Altair

TAF Testing Laboratory 4410

2022 — Obtained platinum distribution rights for Siemens.

2023 — Obtained the agency agreement of Siemens' EDA

Obtained the agency agreement of GRAPHISOFT Archicad

2024 — *New Value Experience Center Officially Opens

LOCATIONS AND DIVERSIFIED TRAINING SERVICES

In 2025, the company conducted 226 training courses, helping 541 companies and training 5,350 professionals.

From January to June 2026, the company conducted 115 training courses, helping 235 companies and training 2,009 professionals.

Physical Courses

> There are 9 education centers in the Mainland, Taiwan and Hong Kong

- ✓ Original factory authorized teaching environment
- ✓ Professional teachers with practical experience
- ✓ Comprehensive teaching materials that are easy to learn and understand
- ✓ Internationally accredited training center

CAD-POWER Online Courses

> Complete and rich online professional courses

- ✓ Flexible learning to acquire professional knowledge at any time
- ✓ Industrial talent training, original factory certification examination
- ✓ Systematize digital teaching materials to enhance learning effects
- ✓ Professional field package courses to enhance soft skills

NATIONAL-TAF CERTIFIED THERMAL PROPERTY MEASUREMENT LABORATORY

The laboratory offers comprehensive hardware and testing services, including T3Ster demonstrations, educational programs, thermal characterization, semiconductor component testing, and power cycling life assessments. We also provide support for thermal model calibration, MicRed system sales, and customized equipment configurations.

Our laboratory is TAF ISO/IEC 17025 certified, ensuring that all testing procedures and results meet international standards. This certification guarantees high accuracy, traceability, and provides customers with reliable quality verification.

Transient thermal resistance measurement

- ✓ Complies with automotive-grade specifications, supports AQG 324 and AEC 0101 testing.
- ✓ Fully automated measurement, real-time monitoring of Rth, and recording of Tj and Vf changes.
- ✓ Supports high-current power cycling, suitable for SiC and IGBT components.

原廠認證
獨立熱特性量測實驗室

通過TAF ISO/IEC 17025
國際認證

Power Cyclic Test

- ✓ Non-destructive viewing allows for analysis of the package structure without disassembly.
- ✓ Precisely distinguishes the thermal resistance ratio of each layer according to JEDEC standards.
- ✓ 1-microsecond high-speed sampling accurately captures transient thermal changes.

PROMOTE INDUSTRY-ACADEMIA COLLABORATION AND SOCIAL WELFARE

We actively promote industry-academia integration, building bridges between the industry and academia through collaborations with manufacturers, enterprises and associations to nurture future talent. At the same time, we support school software donations and technical exchanges, enhancing educational resources and connecting learning with practical applications, injecting new energy into industry development.

We actively engage in public welfare activities and give back to society through tangible actions. Through volunteer services, donation programs, environmental initiatives and other efforts, we care for the disadvantaged, protect the environment and leverage our corporate influence to create a sustainable and green future alongside society.

SUSTAINABILITY THROUGH TRUST, WARMTH THROUGH PEOPLE

SPIRIT & MISSION

In the face of global economic fluctuations, climate change, and pandemic challenges, we deeply recognize the importance of corporate sustainability.

Otsuka Information Technology Group upholds the core values of "Sustainability through Trust, Warmth through People," continuing the Japanese Yamato spirit by placing people at the center and fostering a warm and friendly work environment.

With several consecutive years of operational growth, we have achieved remarkable results in digital transformation and business model innovation. These accomplishments reflect our spirit of "Corporate Heritage and Innovation, Collaborating Across Generations for Long-Term Planning."

We will continue to introduce excellent products combined with innovative technologies and strategies, actively responding to market and environmental changes to achieve long-term sustainable development.
